

10 of 10

A close-up photograph of the top edge of a white cylindrical object, likely a lid or cap. The edge features a distinct stepped or flared profile, creating a series of concentric circles. The material appears smooth and has a slight texture or shadowing along the curves.

A close-up photograph of the top edge of a large, cylindrical stainless steel drum. A bright red arrow is painted on the left side of the drum's rim, pointing towards the right. The drum's surface is reflective and metallic.

A large, stainless steel, cylindrical container with a black base and a handle on top.

- A close-up photograph of a grey, L-shaped mechanical component mounted on a vertical metal pole. The component has a central slot and a protrusion on one side. A small, circular assembly with a red center and a yellow ring is attached to the protrusion. The background is a plain, light-colored wall.

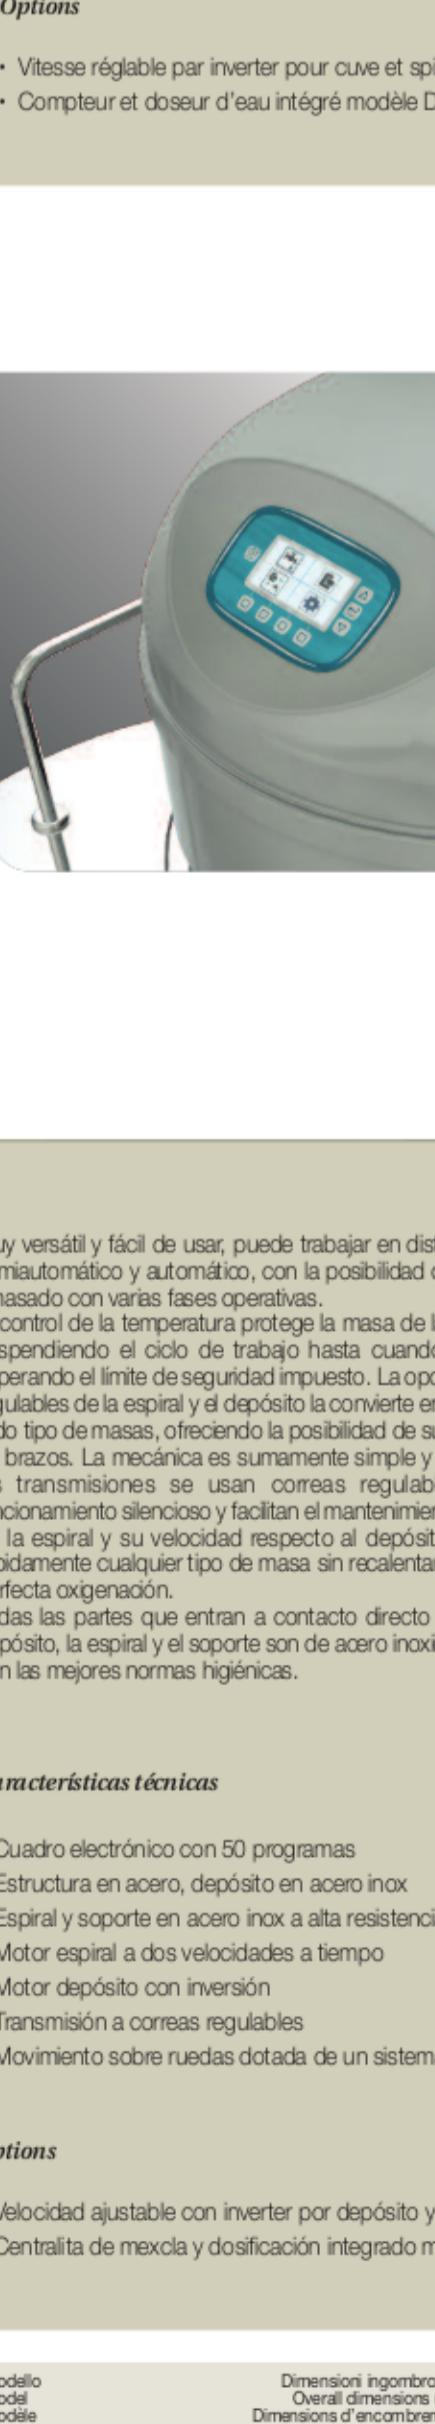

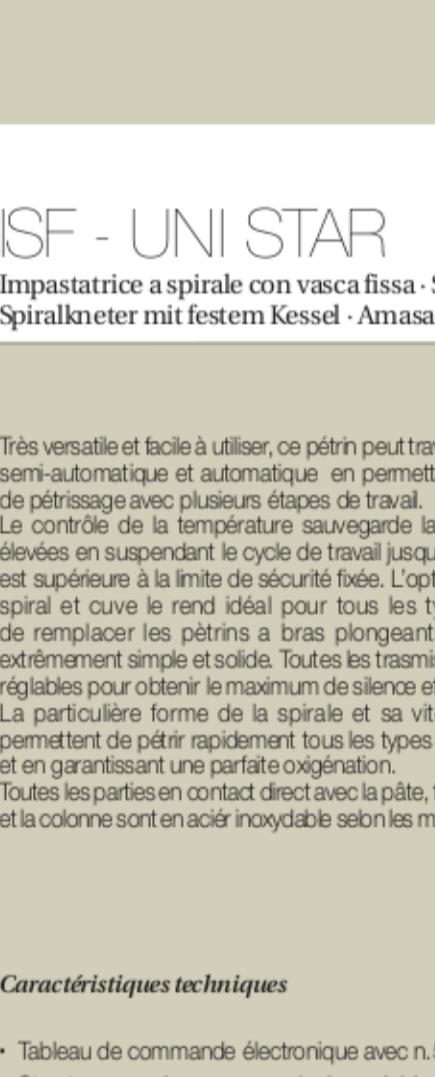

10

- 100

A close-up photograph showing the left side panel of a grey computer case. The panel is smooth and has a slight texture. A vertical metal reinforcement strip runs along the edge where the panel meets the front frame. A small circular hole is visible near the bottom center of the panel.

- A close-up photograph of a cylindrical metal component, likely a bearing housing or part of a machine. The cylinder is mounted on a larger metal frame. A prominent red arrow points horizontally to the left side of the cylinder. The lighting creates strong highlights and shadows on the metallic surfaces.

- A close-up photograph of a grey rectangular base plate. In the center of the plate is a circular hole. A black circular component, possibly a bearing or a wheel, is attached to the plate and is in contact with a vertical metal rod. The background is dark and out of focus.
